

BA Palletizer

Portable & Collaborative Station

The **FANUC CRX-25iA** collaborative robot is at the center of this **portable palletizing station**. These compact stations save floorspace and are easy to install and program. Operators are safe as they replace full pallets. Being portable to other locations in the facility is a breeze with fork pockets and leveling pads integrated into the base for easy transportation and setup.

Area scanners allow full speed without additional barriers
