motioncontrolsrobotics.com

1. Have you defined a price range for the robotic system?

Yes No

2. Define your timeline (PO date, desired date to be in full production).

3. List the project requirements (refer to Tech Talk article for examples).

4. Define and organize each project requirement?

5. Is there a project layout drawing?

Facility & Project Drawing Attached

Facility Drawing Attached

Need a layout drawing

6. Has your application been done before, either exactly, or something very similar, by us or any other integrator or will there be a significant amount of first time design involved?

7. Do you have special plant or process requirements, such as a non-standard control system architecture or special maintenance functions or clean room or hazardous environment?

8. What level of participation do you plan to have in the project e.g.- it isn't uncommon for customers to want to install equipment with their own maintenance personnel or supply some of their own equipment.

9. Are there major buyout items required and what level of responsibility do you want the integrator to have for those items?

10. Will a standard model robot do the job for the application or will a special model, higher cost robot be required such as a long arm variation, or a wash down variation, or a high capacity variation?

Keeping Manufacturers Competitive with
Quality Robotic Solutions
