

FANUC Robot M-3*i*A

Features

The FANUC M-3*i*A is a high speed picking and assembly robot with a 6kg payload. This exclusive six-axis parallel-link design has expanded robotization of transfer and assembly applications.

- Three models are available to meet a variety of applications.
 - FANUC Robot M-3*i*A/6S
The four-axis model features a single-axis wrist rotation. This model is suitable for high-speed picking and Visual Line Tracking.
 - FANUC Robot M-3*i*A/6A
The six-axis model features three rotational axes at the wrist. The directional freedom of a three-axis wrist configuration is ideal for assembly operations.
 - FANUC Robot M-3*i*A/12H
The three-axis model features a 12kg payload without wrist rotation. This model is suitable for super high-speed picking and transfer applications.
- IP67-rated enclosed mechanical unit offers reliable water and dust proof ability.
- Food adaptation option utilizes a high durability surface treatment and food grade lubricant, making it ideal for handling food and beverage products.
- The latest intelligent functions can be applied using *i*RVision or Force Sensor.
